

HearthStone Instruction Sheet

1. How to select the two heroes:

When the game begins, first player should press on the desired hero and then press the hearthstone button, then the second player selects his hero the same way.

2. How the current hero plays a minion:

The hero should press the minion he wants to play then press the “Add to Field” button.

3. How the current hero casts all types of spells (hero target, minion target etc.):

- The hero can cast a hero target spell by pressing the desired spell, then he/she should press the button of the desired hero target, the one button next to the hero text area with his name on it, then press the “Add to Field” button.
- To cast a minion target spell, the hero should press the desired spell, then he/she should press the minion target he wants to cast the spell on, then press the “Add to Field” button.
- To cast any other spell, the hero should press the desired spell, then he/she should press the “Add to Field” button.

4. How the current hero uses his minions to attack the opponent's minion:

The hero should press the minion he wants to use for attack, then press the target minion, then press the “Attack Minion” button.

5. How to end the turn.

The hero should press the “End Turn” button to end his turn.

6. Specify the screen orientation (whether the current hero hand and field is at a fixed half i.e top/button or each hero has a fixed half):

The screen is divided into two parts; the upper one represents a hero and his field and the lower part represents the other hero and his field.

7. Any other details that might be specific to your own implementation:

- How the current hero uses his minion to attack the opponent hero:
The hero should press the minion he wants to attack with, then he should press the opponent hero button, the one button next to the hero text area with his name on it, then he/she should press the “Attack Hero” button.
- The current hero has all his cards in hand represented with full details while the opponent will have his cards hidden by replacing their full details with (“****”).
